FEPQW0100 – Work Order Inquiry

This transaction displays equipment work order information applicable to scheduled corrective maintenance and other unscheduled maintenance work orders. The system retrieves work order information from the Work Order Master table (F4801).

The following conditions apply to the RFgen implementation for the Information Entry transaction within the EnterpriseOne environment.

Note: any of these parameters may be easily adjusted to meet the unique requirements of your company.

Application Name(s)	Code	Table
Work Order Inquiry	P48011	F4801

EnterpriseOne Work Order Inquiry: P48011

The screenshot displays the Oracle EnterpriseOne Work Order Inquiry (P48011) application. The interface includes a menu bar with options like Select, Find, Add, Copy, Del..., Close, Seg..., New..., Dis..., and Ago. Below the menu is a toolbar with icons for various actions. The main area is divided into tabs: General, People, Dates, Category Codes, Status, Order Definition, and Classification. The 'General' tab is active, showing a form with the following fields:

- Equipment Number: 10823
- Business Unit: [Redacted]
- Subsidiary: [Redacted]
- Parent W.O. No: [Redacted]
- Site Number: [Redacted]

Below the form is a table with the following columns: Order Number, Work Order Description, WO St, WO St, W.O. Type, WO Type, and Priority. The table contains one row of data:

Order Number	Work Order Description	WO St	WO St	W.O. Type	WO Type	Priority
211	Replace Rubber Gri...	MA	MWO Approved	6	Preventive Maintenance Order	M

How JDEdwards® Processing Option affects RFgen

This documentation explains which of the JDE Processing Options are used by RFgen and how the red highlighted Proc.Options effect the RFgen script.

Affected RFgen Forms and Transaction Macros

Description	Form Name	Transaction Macro Name
EPM – Work Order Inquiry	FEPQW0100	TEPQW0100

Setup an RFgen Menu

To implement an RFgen Form using JDE Processing Options in an RFgen Menu the JDE Version needs to be specified.
Enter the Form name, followed by a Space. Enter “-Vers=” and the JDE Version.

Form/Menu	Description to Display
FEPQW0100 -Vers=ZJDE0001	1-Work Order Inquiry

Test Script Description: Work Order Inquiry (P48011)

RFgen Input Requirements

Before you begin testing, ensure, for all equipment numbers you will be testing, that the following is setup in EnterpriseOne or PeopleSoft World.

- a. Charge/To Business Unit
- b. Repair Code
- c. Equipment Status Code

JD Edwards Processing Option Settings

Enter the Processing Option values, which correspond, to the version you selected for testing.

JDE Version: ZJDE0001_____

Tab	Processing Option Description	Value

Execution Procedures

ID	Test Case	Expected Result	Pass	Fail
1	Type in a WO# _____ Press the ENTER key	RFGEN will validate and accept the work order number entered—if the work order number is invalid, an error message will be displayed.		
2	Press the “F1” key with the cursor in the WO# field to select and return a work order number	RFGEN will display a list of work order numbers and when selected, the work order number will be returned to the WO# field—if the work order number is invalid, an error message will be displayed.		
3	After reviewing the Work Order Inquiry display	Confirm the work order inquiry results
