**FPMCN0200 – Create Notification**

Page 1

Page 2

Page 3

This mobile application captures required details for creating a notification. The third page allows the user to record multiple items, the problem with that item and the root cause of the problem.

The following conditions apply to the RFgen implementation for the Create Notification transaction within the SAP environment.

Note: any of these parameters may be easily adjusted to meet the unique requirements of your company.

## ✓ Validations

Prompt	Method of Validation
Notification Type	TQ80_T validates notification type and retrieves the description
Purpose	Pre-determined by customer and hard coded
Functional Location	IFLS_VIEW
Equipment	EQUI_ADDR
Dates and Times	Checked for validity only
Item Group	Table: QPGR, Field: CODEGRUPPE, KATALOGART=B
Item Code	Table: QPCD, Field: CODE, KATALOGART=B
Problem Group	Table: QPGR, Field: CODEGRUPPE, KATALOGART=C
Problem Code	Table: QPCD, Field: CODE, KATALOGART=C
Cause Group	Table: QPGR, Field: CODEGRUPPE, KATALOGART=5
Cause Code	Table: QPCD, Field: CODE, KATALOGART=5
Short Description	

## ✓ Edits

Condition	Special Circumstance

## ↔ Function Keys

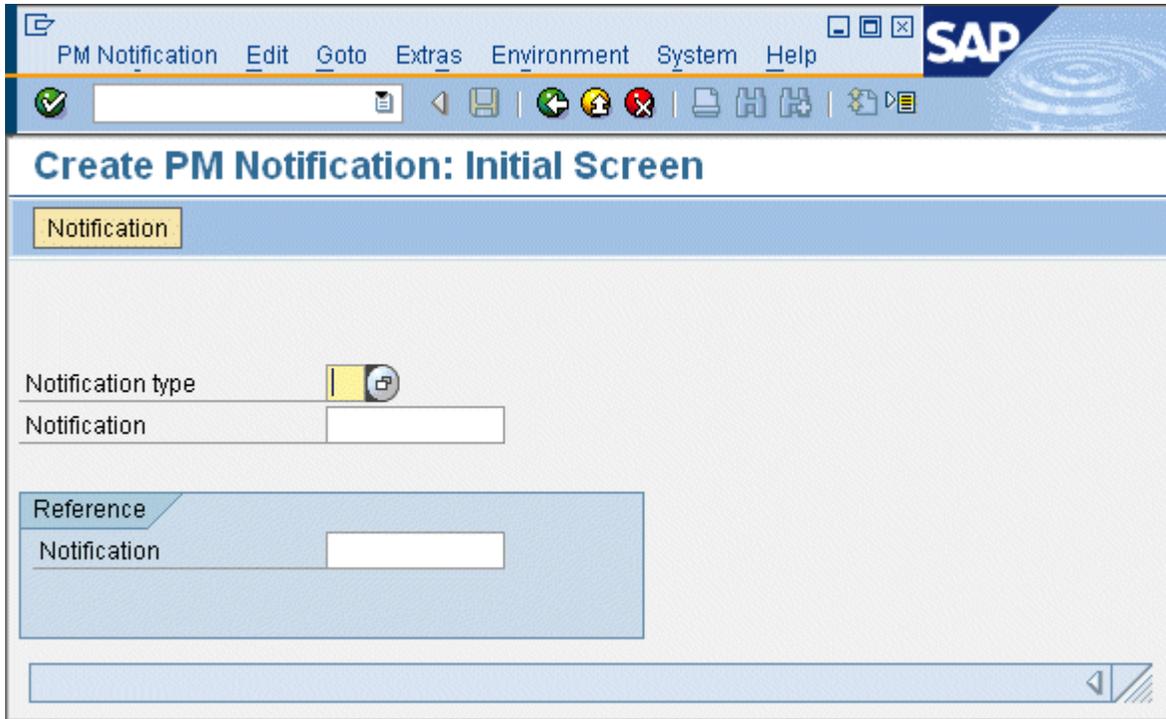

Key	Function
F3	Exit
F5	Search Data for Current Field

## Considerations

1. Do you want to limit the types of notifications that can be created?

## SAP Programs – Reference

Entry 1 frm 1

## Basic Test Script

1. Enter a notification type
2. Enter a purpose, functional location and/or equipment numbers
3. Enter valid and invalid date and time values
4. Note if the item is currently non-operational and record all items, problems and causes

## Test Script Description: Create Notification

### Execution Procedures

ID	Test Case	Expected Result	Pass	Fail
1	Enter a valid Notification Type ____ Press the <b>ENTER</b> key	RFGEN will validate and accept the type entered.		
2	Enter an invalid Notification Type ____ Press the <b>ENTER</b> key	RFGEN will validate and display an error message – the field will continue to error out until corrected		
3	Type in a valid Functional Location _____ Press the <b>ENTER</b> key	RFGEN will validate and accept the Functional Location entered.		
4	Type in an invalid Functional Location _____ Press the <b>ENTER</b> key	RFGEN will validate and display an error message – the field will continue to error out until corrected		
5	Type in a valid Equipment ID _____ Press the <b>ENTER</b> key	RFGEN will validate the Equipment ID		
6	Type in an invalid Equipment ID ____ Press the <b>ENTER</b> key	RFGEN will validate and display an error message – the fields will continue to error out until corrected		
7	Enter valid dates and times	RFGEN will accept a valid date or time entry		
8	Enter invalid dates and times	RFGEN will validate and display an error message – the fields will continue to error out until corrected		
9	Enter a malfunction End date before the malfunction Start date	RFGEN will validate and display an error message – the fields will continue to error out until corrected		

10	Type in a valid Item Group _____ Press the <b>ENTER</b> key	RFGEN will validate the Item Group		
11	Type in an invalid Item Group _____ Press the <b>ENTER</b> key	RFGEN will validate and display an error message – the fields will continue to error out until corrected		
12	Type in a valid Item Code _____ Press the <b>ENTER</b> key	RFGEN will validate the Item Code		
13	Type in an invalid Item Code _____ Press the <b>ENTER</b> key	RFGEN will validate and display an error message – the fields will continue to error out until corrected		
14	Type in a valid Problem Group _____ Press the <b>ENTER</b> key	RFGEN will validate the Problem Group		
15	Type in an invalid Problem Group _____ Press the <b>ENTER</b> key	RFGEN will validate and display an error message – the fields will continue to error out until corrected		
16	Type in a valid Problem Code _____ Press the <b>ENTER</b> key	RFGEN will validate the Problem Code		
17	Type in an invalid Problem Code _____ Press the <b>ENTER</b> key	RFGEN will validate and display an error message – the fields will continue to error out until corrected		
18	Type in a valid Cause Group _____ Press the <b>ENTER</b> key	RFGEN will validate the Cause Group		
19	Type in an invalid Cause Group _____ Press the <b>ENTER</b> key	RFGEN will validate and display an error message – the fields will continue to error out until corrected		
20	Type in a valid Cause Code _____ Press the <b>ENTER</b> key	RFGEN will validate the Cause Code		
21	Type in an invalid Cause Code _____ Press the <b>ENTER</b> key	RFGEN will validate and display an error message – the fields will continue to error out until corrected		
22	Enter to accept the current item set or click the 'Another Item?' button and repeat.	RFGEN will accept all entered items and finally submit the data to SAP.
