Requirements

- RFgen Version 5.0 or later

Table of Contents

Goods Issue

This mobile application decreases inventory. A Goods Issue record is made and the results can be seen in the inventory screen for the given item. This mobile application also supports batch controlled and serialized products.

The following conditions apply to the RFgen implementation for the Goods Issue mobile application within the SAP Business One environment.

Note: any of these parameters may be easily adjusted to meet the unique requirements of your company.

✔ Validations

Prompt	Method of Validation
Warehouse	OWHS
Item	OITM
Batch	OBTN
Bin	OBIN
Quantity	

✔ Edits

Condition	Special Circumstance
Default Warehouse	User defined
Quantity not greater than Quantity on Hand	
Quantity entered <=0	

⊶ Function Keys

Key	Function
F1	Show Menu
F4	Exit
F5	Search

Considerations

1. Do you want the Warehouse to default based on user?

2. Will you allow transactions on negative quantities to increase inventory?

3. Do you need limitations placed on the dollar amount of Goods Issues?

Basic Test Script

1. Record quantities on hand from for the Warehouse, Item and their associated batches that you will perform Goods Issues on.

2. Create and document the following scenarios:

    a. Adjust an amount within the quantity on hand for an item.

    b. Adjust a negative amount for an item. Based upon your specifications, if not allowed, a negative issue warning should appear. If negative adjustments are allowed, inventory should decrease.

3. View the results using the Inventory Posting List and see that the quantity on hand updated to the correct amounts on the processed transactions.

Test Script Description: Goods Issue

RFgen Input Requirements

Before you begin testing, ensure, for the combination of warehouse(s) and item(s) you will be testing, that the following is setup in SAP Business One.

    a. Item

    b. Quantity On Hand

Execution Procedures

ID	Test Case	Expected Result	Pass	Fail
1	Type in a valid warehouse _____ Press the **ENTER** key	RFGEN will validate and accept the warehouse entered.		
2	Type in a valid item _____ Press the **ENTER** key	RFGEN will validate and accept the item entered.		
3	Type in a valid Bin _____ Press the **ENTER** key	RFGEN will validate and accept the Bin.		
4	Type in an invalid warehouse _____ Press the **ENTER** key	RFGEN will validate the warehouse entered and display an error message – the field will continue to error out until corrected		
5	Type in an invalid item _____ Press the **ENTER** key	RFGEN will validate and display an error message – the field will continue to error out until corrected		
6	Type in an invalid bin _____ Press the **ENTER** key	RFGEN will validate and display an error message – the field will continue to error out until corrected		
7	Press the "F5" key with the cursor in the warehouse field	RFGEN will display a list of warehouses		
8	Press the "F5" key with the cursor in the item field	RFGEN will display a list of items		
9	At the RFGEN "Save" the data is submitted	Confirm the goods issue results
